

SealPlate®

The industry standard for sample protection

Application:

General laboratory use, short-term storage, incubation and ELISA

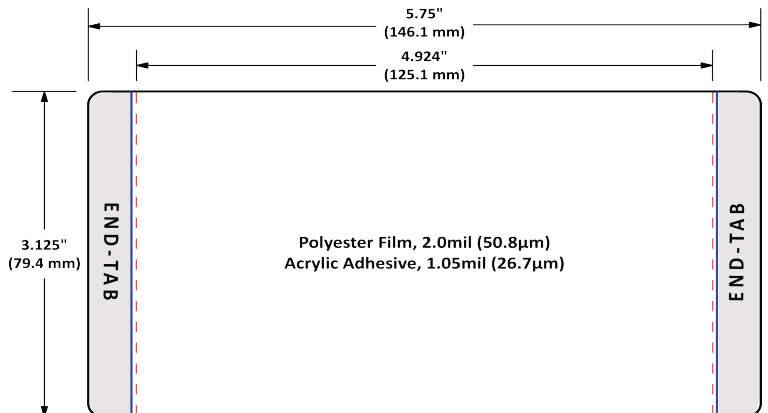

Temperature Range:

-40°C to +120°C

CATALOG #	DESCRIPTION	QUANTITY
100-SEAL-PLT	SealPlate	100
STR-SEAL-PLT	SealPlate, Sterile	100

SealPlate minimizes evaporation, prevents well-to-well contamination and spillage. Eliminates the "edge effect" which can occur with plate lids (e.g. greater evaporation in the outside plate wells).

- Provides a secure seal and is easy to remove
- Rigid polyester film features good clarity and easy handling
- Can be used as a temporary economical seal while awaiting further processing
- Features two end-tabs with perforations
