

**General Purpose Film**

For a more secure seal to minimize evaporation

**Application:**

General laboratory use, short-term storage, incubation and ELISA

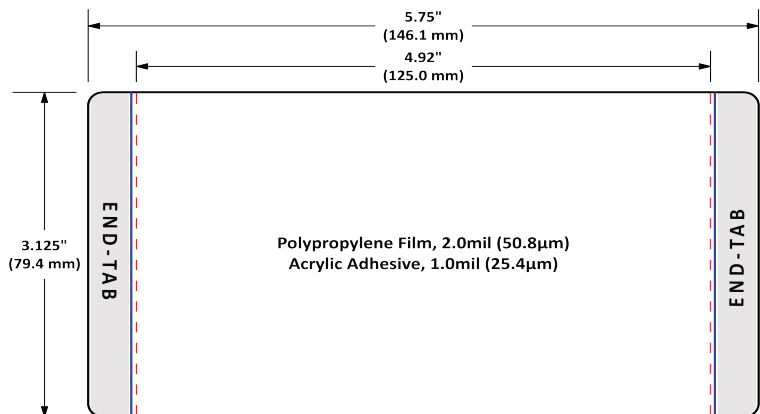

**Temperature Range:**

-40°C to +120°C

CATALOG #	DESCRIPTION	QUANTITY
GP-PP-100	General Purpose Film	100
GPS-PP-100	General Purpose Film, Sterile	100

General Purpose polypropylene films offer superior barrier properties to minimize evaporation and prevent well-to-well contamination. Ideal for use with polypropylene plates.

- Certified DNase- & RNase- free
- Features good chemical resistance
- Provides a very secure seal to minimize evaporation, but is slightly harder to remove than SealPlate films
- Less rigid polypropylene film reduces aerosols upon removal
- Specially formulated adhesive minimizes plate residue
- Can be used as a temporary seal while awaiting further processing

*"For a more rigid easier-to-handle and apply film, check out SealPlate"*
